# Occupational Health Services

ACMC is committed to improving the health of our community. Providing occupational health services is one way we can positively impact the population most important to you — your employees.

Our goal is to collaborate with businesses to foster a safe and healthy work environment that reduces work-related injuries and lost-time incidents.

ACMC Occupational Health places a strong emphasis on communication — with the company and the injured employee. We will work closely with you to understand job functions and options for the injured worker to avoid a lost-time claim.

Whether a business has 10 employees or 1,000 employees, ACMC Occupational Health can work with you to create the right injury-care program.

We focus on cost-effective treatment that causes less interruption to daily operation, less employee downtime, less money spent on hiring temporary workers, and ultimately, less money spent on workers' compensation.

Our commitment to a timely return to work speeds healing and helps ensure a faster recovery for the injured worker.

A benefit to ACMC Occupational Health is our extensive network of providers, including primary and specialty care. If an injury needs referral to a specialist, your employee is likely to be able to see a specialist at ACMC rather than have to leave Ashtabula County.
